Ayush Singh

Backend & systems engineer — TypeScript, Node.js, Rust, Python

Naya Raipur, India · B.Tech ECE, IIIT Naya Raipur, graduating May 2028

LOOKING FOR	WHERE	START
SDE internships & full-time roles	Remote · IST (UTC+5:30)	Available now

I build production-grade backend systems and AI-powered applications: distributed job engines, LLM agents, LSM-tree databases and reverse proxies.

users on a platform I built and run	req/s from my Rust proxy, ~1% off nginx	merged open-source PRs, 11 into FreeCAD	GitHub contributions this year

EXPERIENCE

TRADElogs *Amrevx* · Software Development Engineer Intern

Jul 2026 — Present

TRADElogs — a MetaTrader-5 trading journal SaaS

> *A trading journal that imports every fill and tells you when you are tilting.*

- Built the live AI trading coach: a Groq chatbot grounded on the trader's own data — win rate, profit factor, session and day edges — through a token-bounded context pipeline.
- Streams tokens over SSE with per-user Redis rate limits and rule-based fallback; compliance guardrails and prompt-injection defences treat all external data as untrusted.
- Integrated the Python/FastAPI MT5 bridge with the Node backend, and fixed a race on the broker's single-terminal lock that caused intermittent 500s.

Node.js · Python · FastAPI · Redis · SSE · Groq · MetaTrader 5

VedaAI · SDE Intern

Jun 2026 — Jul 2026

Vedafy Technologies — B2B education platform

> *Teachers brought their whole Google Classroom over in one click.*

- Shipped the Google Classroom integration for VedaAI v3 — rosters, courses and assignments sync, so teachers onboard existing classes without setup.
- Built backend services and REST APIs across the platform, owning features end-to-end with the founding team.
- Reworked UI/UX across key product surfaces for usability and consistency.

Google Classroom API · REST APIs

TheCinePrism · Freelance Full-Stack Developer

Jul 2025 — Present

Movie reviews and a newsletter, in production

> *I built it, I run it, and I made its AWS bill 60% smaller.*

- Built and maintain thecineprism.com: **36,000+** active users, **253,000+** monthly events, sub-100 ms API via Redis caching.
- AWS with Docker CI/CD, Cashfree payments, SES and BullMQ queues.
- Cut monthly infra cost **60%** (**$47** → **$16–20**) by dropping the ALB and NAT Gateway for one EC2 instance with self-hosted Redis and Nginx.

AWS EC2 · Docker · Redis · Nginx · BullMQ · SES · Cashfree

PROJECTS

Sahaayak `Team lead` **An AI staff for the small businessman the internet left behind.**

4+1 agents + an agent factory **14** DynamoDB tables, serverless **240** tests, offline ↔ AWS parity

Python · FastAPI · AWS Bedrock · Strands Agents · Cedar

Pullwright Hand it a GitHub issue. Get back a pull request.

34/40 eval issues solved on Haiku **$0.016** average cost per task **6** LLM providers, auto-failover

`TypeScript · Node.js · Docker · Redis · BullMQ · Postgres · Multi-LLM`

DiskMap A native storage analyzer for Mac and Windows — shipping as freedisk.space.

7.3 s to scan 1.79M files **~55×** faster walk than FileManager **0 B** ever leave your computer

`Swift · SwiftUI · AppKit · macOS · C# · WPF`

Relay A reverse proxy that keeps pace with nginx.

~70k req/s, within 1% of nginx **~5 ms** p99 latency **54 ns** per rate-limit check

`Rust · Tokio · Axum · Hyper`

Strata A storage engine, from the write-ahead log up.

1.87M writes/sec (fsync off) **24×** faster absent-key lookups **46/46** correctness & crash tests

`Rust · LSM-tree · Storage engines`

BelieveMeGuys Copy the traders you trust, fill for fill.

~1.5 s leader's fill to your fill **0.43 s** from order sent to filled **0** withdrawal permissions held

`TypeScript · Next.js · Node.js · PostgreSQL · WebSockets · Delta Exchange`

ICS Fault Detection Six agents watching a water plant for attacks.

99.83% accuracy, SWaT-modelled data **51** sensors, live

`Python · Flask · React · scikit-learn`

LearnGraph Chemistry prep that knows what you are about to forget.

325 concepts in a graph **25** chapters

`TypeScript · Neo4j · PostgreSQL · Claude API`
